Dear readers,

as the three-year ECOEMPOWER journey comes to a end with the end of this month, we want to start our final newsletter with a thank you to all our partners, stakeholders and community members for their valuable collaboration, commitment and exchange. Together, we have worked across five European regional ecosystems to make energy communities more accessible, resilient and effective through practical support structures, digital tools and shared learning.

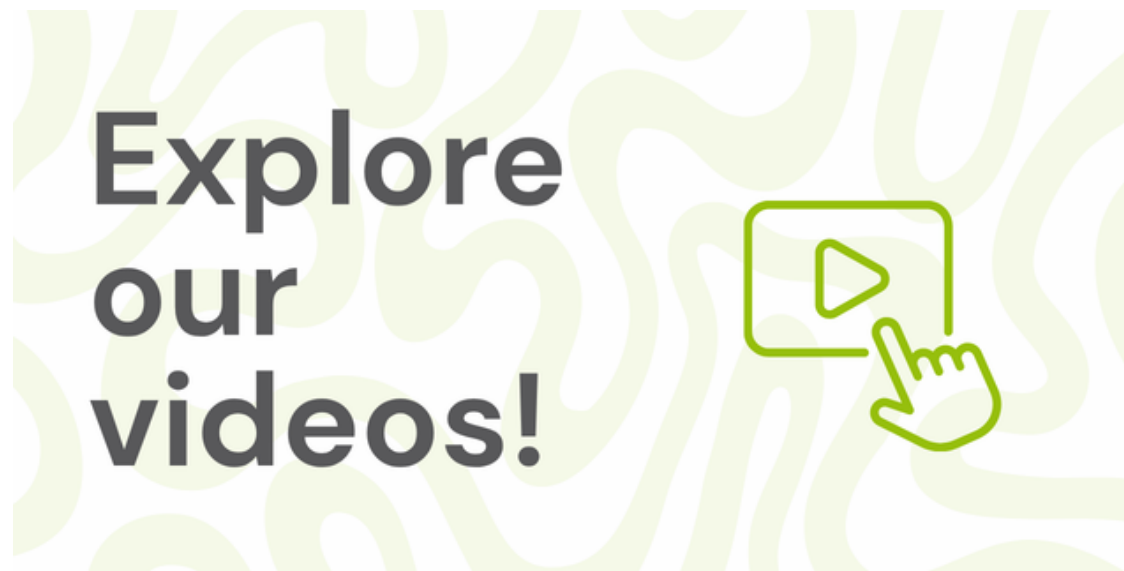

In this final newsletter, we invite you to revisit some of the project's key outputs and make use of the resources developed throughout ECOEMPOWER.

Explore our project videos and discover inspiring best practices. The ECOEMPOWER toolbox offers a range of further materials, tools and publications to support your own energy-community initiatives.

We hope that the knowledge, experiences and connections created through ECOEMPOWER will continue to inspire and empower local action far beyond the end of the project.

Best wishes from the ECOEMPOWER consortium!

New: Discover our ECOEMPOWER project videos!

How can Energy Communities use locally generated energy more effectively?
And how can they turn ideas into practical projects?

Our two new ECOEMPOWER videos provide practical insights:

- The **Energy ICT Platform** video presents a digital tool that helps Energy Communities forecast energy generation, plan energy use and assess costs and benefits.
- In **From Vision to Action**, project partners share their perspectives on local energy communities and explain how One-Stop Shops can provide practical support along the way.

Watch the videos to find out more about ECOEMPOWER's tools, experiences and support services for a more inclusive and sustainable energy future.

**Discover our Best Practices and turn
our practical knowledge into action!**

OUR BEST PRACTICES

What helps Energy Communities move from an initial idea to a successful local initiative? Our Best Practices bring together practical experiences from across Europe, showing how communities and One-Stop Shops can support citizen engagement, develop suitable services and respond to local needs.

Explore the examples to gain inspiration for your own region, learn from proven approaches and discover how successful solutions can be adapted to different local contexts.

Put our ECOEMPOWER Toolbox to work!

Ready to take your Energy Community to the next level? Register for the ECOEMPOWER Community Platform and unlock free access to the ECOEMPOWER Toolbox. Use practical tools to assess your community's maturity, develop robust business models, monitor social impact and make better-informed energy decisions with the Energy ICT Platform.

Join the community today, explore the tools and connect with experts and other Energy Communities across Europe. Turn your ideas into action.
